YOUR REQUIREMENTS FOR THE SURFACE

CUSTOMER

Conditions matter

- Acid / Alkali
- pH
- Temperature
- Corrosion environment
- Mechanical wear
- Cleanliness

Rolls

Longer lifetime and less need for the maintenance.

On-Site

It is possible to achieve roll and cylinder repairs by OnSite in short maintenance shuts.

Hydraulic piston

Coating can be applied exactly to the area needed.

Pump

Reliability in the very demanding positions.

Valve

Excellent tolerance for the heat resistant can be achieved in the versatile aggressive environments.

Requirements

Non-stick ability and corrosion resistance

Non-stick ability and wear resistance

Wear and corrosion resistance and excellent surface quality

Bond strength and wear resistance

Wear resistance

FINCOAT

Our products

CleanCoat

DOH and Grindings

SuperStrong

DiffusionCoat

SlipStop

Applications

Guide, spreader and fly roll surfaces where non-stick is required.

Dryer and cooling cylinders.

Calender, press and suction rolls, valves, hydraulic pistons and other demanding machine parts.

Sleeves, nozzles, forming rolls, press and cutting tools.

Winder rolls, spreader rolls and reel drums.

PRODUCT DEVELOPMENT

We offer the best technology with materials and continuously develop new coatings.

KNOW-HOW
VISION
EXPERIENCE

Wide global co-operation network

THERMAL SPRAYING

It's possible to improve surface properties with thermal spraying.

DIFFUSION COATING

Excellent wear resistance combined with full adhesion in various steel materials can be achieved by diffusion.

Fincoat

Established in **2005**
Over **700** customers
Over **5000** deliveries
Exporting to over **20** countries

High quality hard coating service

Fincoat has specialized on hard coatings. The methods are either thermal spraying or diffusion. Many of our coatings can be applied at the customer's mill as OnSite.

Our activities are based on longstanding experience, versatile know-how, co-operation network and the latest coating technology. Our customer are industrial companies from various industries.
